

Docket No. RSW920000160US1

ABSTRACT OF THE DISCLOSURE

**METHOD, APPARATUS, AND PROGRAM FOR PROVIDING SCRIPTED
ELECTRONIC BUSINESS CARDS AND ELECTRONIC CALENDARS**

The present invention provides a mechanism for building
5 scripted vCard and vCalendar objects based on the accessing
user or the environment in which they are accessed. A vCard
or vCalendar object may generate a text-based vCard or
vCalendar based on credentials. A vCard or vCalendar may be
implemented as a Java server page (JSP) template, wherein
10 the basic structure of the vCard or vCalendar is contained
in the template, with appropriate invocations of Java
methods to fill fields as appropriate. Alternatively, the
vCard or vCalendar may be in standard text form, with fields
replaced with JavaScript code. The holder of the vCard may
15 then dynamically generate the vCard or vCalendar fields by
invoking the scripts corresponding to the fields of
interest, within the context of an execution environment
that contains the credentials.
